

Role of the Internet

Internet means 'International Network'. The internet is one of the most recent creations done by a person that has reformed the style of working and living. It has nearly decreased the separation and has broken all the humanmade boundaries and brought the entire world readily available. Today, the web has become so normal that it is promptly accessible in the entire world.

It has brought data at our doorstep. Internet is an incredible electronic passage that gives quick access to worldwide news and data.

Through the web, we can send 'electronic mail'. The internet has many focal points. One may get any data, one needs on the net. Getting data on absolutely any topic is of incredible favourable position to study in exams. Today, Education without internet is ~~incomplete~~ incomplete. It has become the integral part of a student.

There are some disadvantages of the internet, like one of the biggest being, it is very easy to transfer misinformation. But if used wisely, the web can prove to be of great help.

Harmful Effects of Junk Food

Junk food is very harmful that is slowly eating away the health of the present ~~genara~~ generation. The term 'Junk' itself denotes how dangerous it is for our bodies. It tastes good so people consume it on a daily basis, however not much awareness is spread about the harmful effects of it.

Junk food impacts our health negatively. Junk food is the easiest way to gain weight. The amount of fats and sugar in the food makes you gain weight rapidly. This food only looks and tastes good, other than that, it has no nutrition. The amount of calories your body requires to stay fit is not fulfilled by this food. For example, foods like french fries, burgers, cookies, all have high amounts of sugar and fats. Therefore this can result in kidney failure.

Junk food contains a higher level of carbohydrates. It increases our sugar level. This results in lethargy, inactiveness and sleepiness. Therefore it must be avoided to save our life from becoming ruined. Parents must discourage their children from consuming junk food because of the ill effects it has on one's health.

Write a paragraph in about 120 words on the following topics.

Online Education : Boon or Bane

Online education become more prevalent during pandemic time, which had changed our life in various ways. Now the question arises - Is online education a boon or bane! But as we all know, everything has its merits and demerits.

Some of the merits of online education are, It is convenient and cheap, the study hours are flexible it has decreased the work loads of students as well as of teachers. Online education has given rise to more platforms.

Demerits of Online education are poor connectivity and inaccessibility ~~are~~ ~~con~~ of different devices. Most of the students can't focus on their studies, they are constantly distracted by movies, games, songs etc. Sometimes ~~for~~ technical difficulties give teachers and students a hard time. The most important demerit is too much screentime which is harmful for eyesight. With online education, there is no physical activity, this hampers the health.

As it is said, ~~excess~~ ~~of~~ excess of everything is bad. If online education is taken carefully, it is a boon for us. If a student drafts a balanced time table and follow it, he can avoid many demerits and he can maintain his

his health and get ~~der~~ benefitted.

(2) Modern Technology

When we look around us, we see a huge number of example of technology. The mobile phone in our hand, the headphone we wear for listening to music, the microwave we use to heat our food and even the construction of the building we ~~live~~ live in all use some of the other types of technology.

Technology is so important in today's world that it is almost impossible to imagine a life without it. Not having technology in our lives would make us feel like something in our lives is missing. Technology plays a big role in our lives if we think deeply about it.

Technology is the most useful form of science for the general population. It is when we take the concepts of science and transform them into gadgets and devices that are useful to us. Today everything around us is a form of technology and it is very important in our daily lives. Technology benefits us in a lot of things but we are not aware of its negative impacts. Looking down at an electronic gadget for long periods can lead to neck and back pain, as well as pain in elbows, wrists and hands. It can cause obesity and lack of sleep. Children usually suffer lack of attention, low academic performance and physical inactivity. People are addicted to these technological devices. It is very important to protect yourself and your loved ones from this addiction.

Importance of Planting Trees

As we all know that trees are very useful for us. They are the gift of nature to us. They provide food and shelter for human beings and animals. They keep the environment clean and healthy by absorbing harmful carbon dioxide gas and providing life-giving oxygen gas. Planting tree is the ideal approach to support nature. They are nature air filters and noise safe guards. Thus they maintain the ~~balance~~ balance of these gases in nature. They also help in bringing rain, which fulfils our need for water. Hence we can say that trees are very essential for life. Yet, today, a lot of trees are being cut insensibly and mercilessly for personal and commercial benefits. Big forests are now cleared in one shot. This mass clearing of trees is called deforestation. The rate of deforestation, today, is highly increasing without caring about how will life be possible on earth without them. We can imagine what will happen without oxygen and water. Thus, we must save trees from being cut if we want to sustain life on earth. Hence, we must always remember - "SAVE TREES, SAVE LIFE".

Women Empowerment

Women empowerment refers to the activities undertaken to improve the social, economic and political status of women in the world. It mainly refers to practice of making women independent so that they can make their own decisions as well as handle their lives without any restrictions. The main motive of women empowerment is to help women stand equally with men.

Women are empowered when they have no restriction on education, profession and life style. It is the most important factor in a ~~con~~ country's overall growth. A woman feels powerful when she take significant decisions.

~~Empowerment is~~ Empowering women also involves challenging traditional gender roles and stereotypes. Through empowerment, women can achieve financial independence and assert their rights in various spheres of life. This has brought a lot of economic and social gains to India.

Empowered women can contribute a nation building by joining any sector like an army, social service, politics, education, corporate sector etc. overall, this fosters a more inclusive and equitable society where everyone has the chance to prosper.

Power of Press in Democracy

In a democracy, the press play a vital role in informing the public, holding those in power accountable and making the public aware about what goes around the globe. A free and independent press acts as a watchdog, scrutinizing government action and reporting on matters of public interest. By providing information, the press enables citizens to make decisions and participate meaningfully in the democratic process.

The press acts as a check on those in power by investigating and reporting on corruption or misconduct of authority. The press can expose wrong doing and ensure that those in position of power are held responsible for their actions.

This press creates a space for public discussion and debate on important issues. A free press fosters transparency by making information accessible to the public. This helps to build trust and promotes accountability.

The press serves as a crucial pillar of democracy by ~~in~~ informing the ~~the~~ public, holding power accountable and facilitating an open and informed society.
